Springer International

Bulletin of Volcanology was founded in 1922, as *Bulletin Volcanologique*, and is the official journal of the International Association of Volcanology and Chemistry of the Earth's Interior (IAVCEI). Beginning with Volume 48 (1986), the journal has been published by Springer International and edited by H.-U. Schmincke and S. R. J. Sparks

---

Copyright
Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in the journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express, or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or inhouse use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page, or a minimum of US $ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Other regulations: Authors publishing in this journal can, under certain conditions, benefit from library and photocopy fees collected by VG WORT. Authors resident in the Federal Republic of Germany or in West Berlin can apply to Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.

Contents of volume 49 1987

Beccaluva L → Cristofolini et al 599
Bonneville A → Rousset D et al 713
Borgia A → Casertano L et al 588
Brown GC → Rymer H 389
Busby-Spera CJ, White JDL: Variation in peperite textures associated with differing host-sediment properties 765
Camp VE, Hooper PR, Roobol MJ, White DL: The Madinah eruption, Saudi Arabia: Magma mixing and simultaneous extrusion of three basaltic chemical types 489
Carey SN → Sigurdsson H et al 467
Casertano L, Borgia A, Cigolini C, Morales LD, Montero W, Gomez M, Fernandez JF: An integrated dynamic model for the volcanic activity at Poas volcano, Costa Rica 588
Chevallier L → Verwoerd WJ 399
Cigolini C → Casertano L et al 588
Clague DA: Hawaiian xenolith populations, magma supply rates, and development of magma chambers 577
Clague D → Moore JG 752
Cristofolini R, Menzies MA, Beccaluva L, Tindle A: Petrological notes on the 1983 lavas at Mount Etna, Sicily, with reference to their REE and Sr—Nd isotope composition 599
Di Vito M, Lirer L, Mastrolorenzo G, Rolandi G: The 1538 Monte Nuovo eruption (Campi Flegrei, Italy) 608
Duncan AM → Guest JE et al 527
Eschenbrenner S → Hirn A et al 723
Fernandez JF → Casertano L et al 588
Fisher RV → Sigurdsson et al 467
Francis P → Naranjo JA 509
Garcia MO → Reagan MK et al 415
Gardeweg M, Ramírez CF: La Pacana caldera and the Atana Ignimbrite — A major ash-flow and resurgent caldera complex in the Andes of northern Chile 547
Gill JB → Reagan MK et al 415
Girardin N → Hirn A et al 723
Glicken H → Siebert L et al 435
Gomez M → Casertano L et al 588
Guest JE, Kilburn CRJ, Pinkerton H, Duncan AM: The evolution of lava flow-fields: observations of the 1981 and 1983 eruptions of Mount Etna, Sicily 527
Hackett WR → Houghton BF et al 737
Helz RT, Thornber CR: Geothermometry of Kilauea Iki lava lake, Hawaii 651
Hildreth W: New perspectives on the eruption of 1912 in the Valley of Ten Thousand Smokes, Katmai National Park, Alaska 680
Hirn A, Girardin N, Viodé JP, Eschenbrenner S: Shallow seismicity at Montagne Pelée volcano, Martinique, Lesser Antilles 723
Hooper PR → Camp VE et al 489
Houghton BF, Latter JH, Hackett WR: Volcanic hazard assessment for Ruapehu composite volcano, Taupo volcanic zone, New Zealand 737
Johnson RW: Large-scale volcanic cone collapse: the 1888 slope failure of Ritter volcano, and other examples from Papua New Guinea 669
Kilburn CRJ → Guest JE et al 527
Kim SE → Reedman AJ et al 541
Latter JH → Houghton BF et al 737
Lenat JF → Rousset D et al 713
Lirer L → Di Vito M et al 608
Malavassi E → Reagan MK et al 415
Mastrolorenzo G → Di Vito M et al 608
Menzies MA → Cristofolini R et al 599
Merriman RJ → Reedman AJ et al 541
Montero W → Casertano L et al 588
Moore JG, Clague D: Coastal lava flows from Mauna Loa and Hualalai volcanoes, Kona, Hawaii 752
Morales LD → Casertano L et al 588
Naranjo JA, Francis P: High velocity debris avalanche at Lastarria volcano in the north Chilean Andes 509
Park KH → Reedman AJ et al 541
Pinkerton H → Guest JE et al 527
Ramírez CF → Gardeweg M 547
Reagan MK, Gill JB, Malavassi E, Garcia MO: Changes in magma composition at Arenal volcano, Costa Rica, 1968–1985: Real-time monitoring of open-system differentiation 415
